

2022 F-150 Lightning Platinum

Subject: Product Offering Change to your 2022 Ford F-150 Lightning Platinum

Dear Valued F-150 Lightning Platinum Customer:

So that we can produce your vehicle more quickly, Ford will be making the following changes to the 2022 Ford F-150 Lightning Platinum. Due to the global semiconductor shortage, your 2022 Ford F-150 Lightning Platinum is not equipped with the features identified below, as they are not currently available. We know this is not ideal and not the experience we aim for as a brand. But we also know that getting a new vehicle is an important and exciting time, so we are doing everything we can to help deliver on that, despite these global challenges. Thank you for your understanding & continued support. The following features have been removed to get you your vehicle faster:

Multi-Contour Seats with Active Motion® (Driver and Passenger) Removal

- o This feature delivers a seat back and bottom massage.
- o Due to this inconvenience, the Manufacturer's Suggested Retail Price (MSRP) of your vehicle has been reduced by \$300. This adjustment will be reflected on your window label.

Max Recline Seat Removal

- o This optional feature provides seats that fold flat to nearly 180 degrees.
- o If vehicle ordered with optional Max Recline seat, vehicle MSRP has been reduced by \$345 to account for the removal of this option.

Acknowledgement

By providing my signature below, I understand and agree as follows:

- This vehicle is not equipped with the above checked feature(s), and this will not constitute a defect with respect to my vehicle.
